Compliance with the ISPM 15 standard is an essential condition for the unrestricted use of load carriers in the international movement of goods.

All EPAL CP pallets are therefore produced according to the stringent specifications of the IPPC and can thus be deployed around the globe. Local plant protection agencies will provide information on the countries that recognise the IPPC standard.

Safety and quality are of particular importance in the chemicals industry. Protecting employees, the environment and the load itself take priority. With the new quality-assured EPAL CP pallets, EPAL is closing a major gap in the chemicals industry’s logistics chain. You can obtain EPAL CP pallets 1–9 from any one of the more than 1,500 licensed manufacturers and repairers. Supplier search under www.epal.eu.
