**FACTS & FIGURES**

Compliance with the ISPM 15 standard is an essential condition for the unrestricted use of load carriers in the international movement of goods. All EPAL CP pallets are therefore produced according to the stringent specifications of the IPPC and can thus be deployed around the globe. Local plant protection agencies will provide information on the countries that recognise the IPPC standard.

**MARKINGS**

- “EPAL in oval” on the right-hand corner block.
- IPPC symbol, country code, registration number of the national plant protection authority, heat treatment on the left-hand corner block.
- CP type marking and EPAL ID number (licence number-year-month) on the central block.
- EPAL control staples

**QUALITY CONTROL**

EPAL load carriers around the world are subject to independent quality inspections carried out by external inspection organisations. This is the only way for EPAL load carriers to guarantee the consistently high quality that they offer the markets.

**HANDELING**

4-sided accessibility and high quality enable efficient handling during production, storage and transportation all the way along the supply chain. Compatible with all (conventional) standard load carriers, industrial trucks and warehouse systems. Use: As container pallet, special pallet for large containers with bottom outlet.

**ISPM 15**

Compliance with the ISPM 15 standard is an essential condition for the unrestricted use of load carriers in the international movement of goods. All EPAL CP pallets are therefore produced according to the stringent specifications of the IPPC and can thus be deployed around the globe. Local plant protection agencies will provide information on the countries that recognise the IPPC standard.
