When stacking laden pallets on a solid, even surface, the bottommost pallet must not exceed a load of max. 5,500 kg.

Markings

EPAL in oval on the left and right corner block (since 08/2013)

IPPC symbol, country code, registration number of the national plant protection authority, heat treatment, licence number-year-month on the central block

EPAL control staples

Handling

4-sided accessibility with chamfered lower edge boards on both sides enables highly efficient handling during production, storage and transportation all the way along the supply chain. Compatible with all (conventional) standard load carriers, industrial trucks and warehouse systems.

Quality control

Quality is the key criterion for the reliable, safe deployment of EPAL Euro pallets within the supply chain of international companies. The open pool of EPAL Euro pallets is the only pool around the globe which undergoes regular independent quality inspections by one of the most renowned inspection companies in the world, Bureau Veritas.

ISPM 15

Compliance with the ISPM 15 standard is the most essential condition for the unrestricted use of load carriers in the international movement of goods. All EPAL Euro pallets are therefore produced according to the stringent specifications of the IPPC and can thus be deployed around the globe. Local plant protection agencies will provide information on the countries that recognise the IPPC standard.

Repair

Damaged EPAL Euro pallets can be repaired cost effectively and in a climate-friendly manner by all EPAL-licensed pallet repair operations. Following the quality-assured repair, EPAL Euro pallets repaired according to standard receive a repair nail bearing the “EPAL” trademark and the licence number of the repair operation.
